

BOOROOMOOKA ANGUS

Established 1926

Your Quality Choice

CALVING EASE | QUIET TEMPERAMENT | HIGHLY FERTILE | HIGH MARBLING
GOOD GROWTH | STRUCTURALLY SOUND

261 HERD BOOK REGISTERED BULLS

Friday 12th August 2022
12 noon at Keera, Bingara, NSW

History and Breeding Principles

Booroomooka is one of the largest, most innovative and established Angus Studs in Australia. Integrity, Commitment, Reliability and Innovation are key values to the business.

The stud was founded by Gordon Munro from Keera, Bingara, NSW in 1926. An efficient, hardy, fertile herd has been developed since 1926. The Keera Property has been owned and managed by five generations of the family since 1858. In 1926 five stud heifers were purchased from Mr NL Forster, Abington, Armidale. In 1928 more heifers were introduced from Glennelg, Waiterenui and Matapihi Studs in New Zealand.

The family owned business, is now managed by Gordon's son Hugh and grandson Sinclair. The business has properties in the Bingara area covering over 11,000 hectares. The main breeding property "Keera" is the cow/calf factory and where the replacement heifers are grown out. "Glen Park" is used to grow out the young bulls and steers. "Glenroy" has a high quality self replacing Angus commercial cow herd, producing mostly feeder steers to analyse the performance of Booroomooka bloodlines.

Over the years many bulls, embryos and semen have been imported from Scotland, USA and New Zealand. Booroomooka Angus Stud was very successful in the show ring for over sixty years. Nowadays more emphasis is placed on running cattle in larger contemporary groups, on farm visual assessment, huge on farm objective data collection, structured progeny tests and use of genomic technology. The Stud aims for continual improvement and increased accuracy in describing the genetic merit of the seedstock that it sells.

Structurally sound, fertile, quiet bulls with the genetic potential to increase long term profitability.

Welcome to the Booroomooka Annual Bull Sale

Dear Friends,

Again this year we have seen unprecedeted optimism in the cattle industry with significant premiums for progeny of high quality angus bulls. As you look through this catalogue, you will see that you have a wonderful choice of bulls with Calving Ease, Good Growth, High Fertility and High Marbling. All bulls have been genomically tested to increase the accuracy of the estimated breeding values (EBVs) and are Sire Assured.

Integrity, Commitment, Reliability and Innovation are our key values. Our objective is to focus on traits that help increase the long term profitability of our customers.

The Booroomooka cow herd is unique, developed on our hilly native grass country. Our cows are resilient - adapted to cope with lower quality native grasses and seasonal fluctuations. They calve as two year olds and need to be productive with good doing ability. Our functional fertile cow herd, with leading maternal traits is imperative to the success of our bull customers.

Our strong commitment to increase marbling and growth has helped increase the demand for Booroomooka Angus sired progeny. Years of performance recording and selection of cattle with high carcase quality is being rewarded.

The Booroomooka Bulls are adaptable and have been successfully used in different production systems (grain fed, grass fed and organic) and areas - from our local area Northern NSW to Central Qld, Southern NSW, Victoria, Northern Territory, Tasmania, King Island, South Australia to WA.

The bulls are in condition "ready to work" for you, passing a Veterinary Bull Breeding Soundness Evaluation, have been independently evaluated for structural soundness, temperament and coat type. Please note, this year the Sale includes 35 Yearling Bulls (Lots 93-104,156-166,250-261). The Yearling Bulls will be independently assessed closer to sale day. Also all the bulls will be scanned for IMF%, EMA, Rib and P8 Rump fat prior to the sale.

If you require any more information about the sale bulls please let us know.

Again we are providing flexibility for buyers who are unable to physically attend the sale. All lots will have video footage and buyers can bid on Auctions Plus. We also have a free independent inspection service available for you to use on or prior to sale day. Please contact us if you would like to use this service.

Two Open Days are to be held, from 9am to 5pm on 4th August and 11th August 2022. Bulls can also be inspected from 9am on sale day morning. If you would like to inspect the bulls at any other time please let us know.

Kind Regards,

Hugh and Sinclair Munro

Booroomooka Sale Details

SALE LOCATION:

The Booroomooka Angus Sale is to be held on the property Keera, 5796 Copeton Dam Rd, Bingara, NSW, 2404.

Nearest commercial airports are Armidale, Inverell, Moree or Tamworth. Small planes can land on our Keera Property Airstrip or at Bingara. Please ring us – to advise landing time so we can arrange for you to be picked up. Bulls may be inspected from 9am on the morning of the sale, or at any other time by arrangement with the selling agents or vendors.

GPS: Longitude 29°59'45.3", Latitude 150°46'43.7" Keera is 28km east/south east from Bingara on the Bundarra Rd (or Copeton Dam Rd)

From Armidale: Approx 11/2 hours north west, travel to Bundarra and then Bingara

From Goondiwindi: Approx 2 hours south, travel to North Star, Warialda, Bingara

From Tamworth: Approx 2 hours north, travel to Manilla, Barraba, then Bingara.

From Inverell: Approx 50 minutes, travel on Copeton Dam Rd, from Copeton Dam travel towards Bingara.

ACCOMMODATION

Bingara Imperial Hotel Motel	(02) 6724 1629
Bingara Fossickers Way Motel	(02) 6724 1373
Bingara Sportsmans Hotel	(02) 6724 1880
Bingara The River House	0428 834 281
Bingara Peranjou Cottages	0427 715 726
Bingara Riverside Caravan Park	(02) 6724 0081
Warialda Sunflower Motel	(02) 6729 1344
Inverell Top of the Town Motel	(02) 67222622
Barraba The Playhouse Hotel	(02) 67821109

BUYER REGISTRATION

A Buyer Registration system will apply. We strongly encourage you to Pre Register to the Selling Agents as a buyer by 5pm Wednesday 10th August. This saves time on sale day. Buyers who Pre Register receive two complimentary lunch vouchers.

SALE CONDITIONS

All lots will be sold subject to the usual conditions governing auction sales, these will be displayed on sale day. The auction price will be exclusive of GST.

DISCLAIMER

All reasonable care has been taken to ensure that the information provided in this catalogue is correct. However the vendor or the selling agent do not assume any responsibility for the correctness, use or interpretation of the information included in this catalogue.

GUARANTEE

Booroomooka guarantees the structural soundness and fertility of the bulls. The entry of every bull constitutes a guarantee by the vendor that if a bull should prove infertile or breaks down to reasons other than injury, misadventure, disease, mismanagement or negligence, the vendor will provide you with a satisfactory replacement if available, or issue you with a credit equal to the purchase price minus salvage value. This credit may be used to purchase an animal at a future Booroomooka sale. Any request for replacement/credit must be lodged with the vendor within 11 months of purchase.

INSURANCE

Facilities for insurance will be available at the sale.

HEALTH AND VACCINATION STATUS

The vendor has a BioCheck Biosecurity Plan, with a JBAS^A Score. All bulls are eligible to travel to all states and territories including WA. The plan was done in consultation with veterinary advice. The plan is designed to ensure the farms have considered the major biosecurity risks and has appropriate risk strategies in place. The herd is monitored negative TB and is confirmed free of brucellosis. All bulls have been tested PI free of pestivirus.

R Bulls

Booster vibriosis vaccine in October 2021.

Booster Three Day sickness (BEF) in Feb 2022

Booster 7in1 May 2022

Drench/Lice treatment 2nd July 2022

S Bulls

Booster vibriosis vaccine in July 2022.

First Three Day sickness (BEF) in August 2022

Booster 7in1 May 2022

Drench/Lice treatment on 14th June 2022

FEET

None of the cattle offered for sale have received treatment for their feet.

VET INSPECTED

All bulls offered for sale have undertaken a Bull Breeding Soundness Examination. All bulls were subjected to a physical examination of structural soundness, examination of the reproductive trait, including an internal examination and visualization of the penis. Each bull was also subjected to a semen collection and evaluation.

GENETIC TESTING

The genetic status of individual sale bulls is displayed in the catalogue.

LOOKING AFTER YOUR NEW BULL

After purchasing your bull, please ensure you fill out the buyers instruction sheet which includes delivery instructions. The sale bulls have been prepared so that they are ready to go to work with your cows. Previous to that they have been fed a nutritionally balanced high fibre mix. When you get your new bull home do not put him with older bulls. Booroomooka bulls are used to being handled with horse, vehicles and respond to quiet working dogs. When your new bull is joined to your cows, inspect him at least weekly to ensure he is walking freely and his penis appears to be normal. If there is a problem take him out of the cows and report to a vet. Early treatment is vital. It is a good idea to have spare bull/s ready to work if a problem/s occur. When joining is finished, the bull would appreciate a drench and lice treatment. If you have any questions regarding the bulls, the progeny etc please let us know. If you require more information go to www.booroomooka.com.au.

SALE DAY PHONE (02) 6723 6622

Booroomooka Elite Bulls

Our Sale Bulls include our very best. To ensure genetic continuity we will retain semen access (rights) for specific bulls - the "Booroomooka " bulls.

Lots showing this elite logo will require that Booroomooka shall retain the right to collect up to 600 straws for Booroomooka use only. Booroomooka will collect semen by agreement and at its cost and Booroomooka will reimburse for any extra expenses associated with the semen collection for Booroomooka's use.

NLIS Tag/Freeze Branding

All bulls will have NLIS ear tags attached and we will transfer to your nominated PIC. All bulls will be freeze branded with the bull ID.

Genetic Improvement Tool

To make genetic change in traits we use the Trans Tasman Angus Cattle Evaluation as a valuable tool. EBVs have been proven to be more accurate than raw performance measurements for assisting in the selection of breeding stock. Raw data in some cases can be misleading due to environmental factors. Raw measurements should not be compared unless the cattle are in the same contemporary group.

Whilst in the calculation of EBVs all available pedigree, genomic and performance information on each animal and its relatives (parents, ancestors, siblings, progeny, etc.) is combined to provide a single best estimate of an individual's genetic merit for each trait. In addition, allowance is made for environmental differences between properties, seasons and management groups on each animal's performance. Differences in heritabilities between traits and genetic associations between traits are also accounted for in the calculation of EBVs.

261 Quality Bulls to Sell

- 97 Years of Breeding a Resilient Fertile Productive Cow Herd
- Integrity, Commitment, Reliability and Innovation
- Veterinary Bull Breeding Soundness Evaluation
- Structure, Temperament, Coat Type and Frame Assessed
- Vaccinated for Vibriosis, 7 in 1, 3 day sickness and Drenched
- Tested PI Free
- Progeny Recognition in the market place
- Sire Assured and Use of Genomic Technology
- Research into Building Better Breeders
- Progeny Testing through Angus Sire Benchmarking
- **Bulls Ready to work for You !**

Elite Lots

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

TACE

TransTasman Angus Cattle Evaluation

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

Calving Ease	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcass	CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
	RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

DATA COLLECTION AND EBVS

When selecting, describing and to make genetic change we use the Trans Tasman Angus Cattle Evaluation (TACE) as a valuable tool. Booroomooka aims for continual improvement and to increase the accuracy in describing the genetic merit of seedstock.

The TACE updates EBVs every fortnight as more performance, structural and genomic information is collected. The Printed Catalogue is the EBVs of the bulls as of 1st July 2022. You are able to look up the latest ebvs on the Angus Australia website.

Huge amounts of data is continuously collected by Booroomooka Angus. Prior to the Sale all the bulls have scan and structural data collected.

All Sale bulls have undertaken extensive genomic testing and are Sire Assured by Angus Australia.

Integrity, Commitment, Reliability and Innovation are key values of Booroomooka Angus. We hope you are part of our journey in producing profitable - high quality Booroomooka Angus Sired Progeny.

Wishing you all the best and we thank you for your interest in Booroomooka Angus.

Structural Assessment

The Booroomooka Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. The Booroomooka bulls were assessed by Liam Cardile (Accredited Assessor 1033) of BEEFXCEL on 31/5/2022. The S Bulls will be assessed on 21/07/2022.

The beef class structural assessment system uses a 1-9 scoring system for feet and leg structure. A score of 5 is ideal - but rare in two year old bulls.

A score of 4 or 6 shows slight variation from ideal.

An animal scoring 4 or 6 would be acceptable in any breeding program.

A score of 3 or 7 shows greater variation but would be acceptable in most programs.

A score of 2 or 8 are low scoring animals and should be looked at closely before purchasing. A score of 1 or 9 should not be catalogued and are considered culls.

CODES FOR STRUCTURAL ASSESSMENT

FC: Front Feet Claw Set

RC: Hind Feet Claw Set

FA: Front Feet Angle

RA: Rear Feet Angle

RS: Rear Legs (Side View)

RH: Rear Legs (Hind View)

LM: Muscle Score

TEMP: Temperament (note: scores 1 to 5, lower the score - more favourable)

SN: Sheath/Navel (note: scores 1 to 5, higher the score - more favourable)

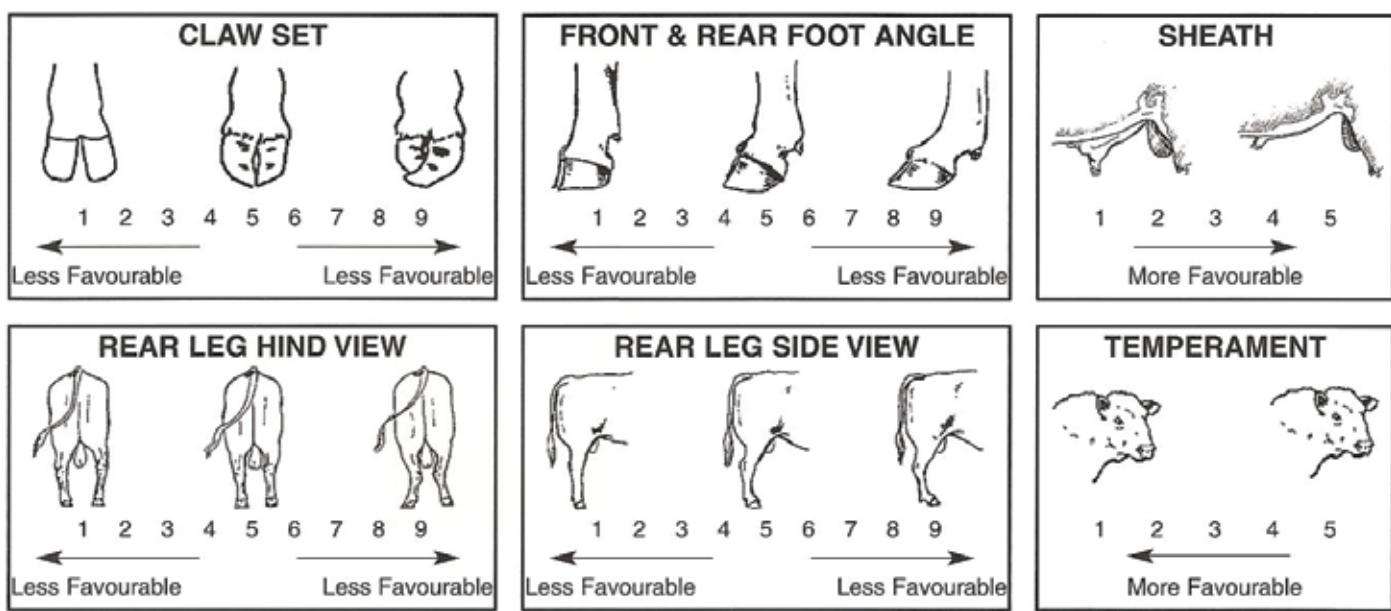

COAT SCORE (CT)

Visual Coat Scores were assessed. Selecting animals for a sleeker coat may increase their tropical adaptability. Coat Scores are recorded on a 1-7 scale, with 1 being sleek and 7 being woolly. Coat Score 1 is extremely short and found in some Bos indicus and some of their crossbreds.

CT	Type
2	Very Short
3	Fairly Short
4	Fairly Long
5	Long
6	Hairy

FRAME (FRM)

The Sale bulls were assessed for frame. The height or 'frame' of cattle of a given age is closely related to maturity type. Smaller Framed cattle generally have an earlier maturity pattern than larger framed cattle. The bulls have been classified into four frame groups – small (S), medium (M), large (L) and very large (VL).

REFERENCE SIRES

High Quality Sons

Rennylea L519 (NORL519) – 51 sons to sell

Buyers have a quality choice of 51 L519 sons that are bred from productive Booroomooka matrons. L519 is breeding true to type, very quiet (top 9%) with impeccable structure (top 2% claw). L519 has superb carcase merit, high marbling (top 4%) and (top 10%) Growth with good calving ease.

L519's daughters are highly fertile and have lovely udders. They are quiet, with nice length and have good mature body condition (Top 1% Breeding Better Breeders). His maternal line is impeccable with his mother H414 a super impressive cow. His maternal grand dam C310, a Te Mania Limited daughter, oozes longevity, raising 13 calves in the Rennylea herd. L519 is such a flawless bull with high accuracy and reliability.

Baldridge Beast Mode (USA17960722) – 20 sons to sell

A breed legend – Beast Mode is one of the highest demand sires of the breed. Incredible thickness and power, with dam Isabel Y69 being one of the most powerful sought after maternal line in the world. Beast Mode has calving ease with tremendous growth. Structurally sound, quiet cattle with loads of volume.

GB Fireball (USA18690054) – 18 sons to sell

Exciting sire! - A calving ease sire with carcase quality with sensational performance. Offers unmatched combination of calving ease, growth, marbling (top 2%) and muscle (top 2%). He is breeding thickness and shape.

Booroomooka Paragon P96 (NGMP96) – 15 sons to sell

Awesome sire who is breeding so well. A bull with real eye appeal, shape B- muscle, slick coat, very quiet, moderate frame, structurally sound with low birth weight, explosive growth (top 3%) and high retail beef yield. Lovely functional maternal line, his dam M566 a superb breeder. He is in the Cohort 11 Angus Benchmark Progeny Test and is a Booroomooka AI Semen Sire.

Booroomooka Jackpot N418 (NGMN418) – 15 sons to sell

Jackpot is a large framed Lotto son with heaps of length. Positive calving ease with massive growth (top 4%). Excellent fertility (Top 1% Days to Calving). Outstanding Carcase Traits with Carcase Weight (Top 2%), Good muscle and High Marbling (Top 7%).

REFERENCE Sires

High Quality Sons

Te Mania Newly N549 (VTMN549) – 15 sons to sell

Purchased as top priced bull at the 2019 Te Mania Sale for \$42,000. Jenkins son with real eye appeal. Low birth weight bull that bends the growth curve, has high marbling, large scrotal size, quiet temperament with good structure.

Murdeduke Quarterback Q011 (CSWQ011) – 8 sons to sell

Exciting new sire, with heaps of length and frame. Has an exceptional maternal line. Excellent calving ease, structurally sound with high growth, doing ability and high marbling (top 2%). These are some of the first Quarterback sons to sell in Australia.

Booroomooka Normandy N213 (NGMN213) – 18 sons to sell

Selected for eye appeal, moderate frame, plenty of shape, quiet temperament and good structure. Maternal traits packed in his pedigree with a combination of Booroomooka Genius G120, New Day and Booroomooka Inspired. Line Bred to Ardrossan Equator A241.

Landfall Keystone (TFAK132) – 3 sons to sell

Keystone is a large frame balanced bull with quiet temperament and length of body. Proven calving ease sire with explosive growth.

Booroomooka Leroy (NGML173) – 3 sons to sell

Leroy is a stylish bull with impressive looking progeny. He is a lovely free moving bull with length and balance. Top selling bull in 2017 to Richard and Jan Baillie for \$33,000.

Booroomooka Progress P466 (NGMP466) – 12 sons to sell

Stylish young bull who sold for \$24,000 (second top priced bull) to the Brazier family in 2020. Exceptional easy doing quiet bull with sound feet and legs. Calving ease, high fertility with high marbling.

Booroomooka Paddo P694 (NGMP694) – 10 sons to sell

Attractive bull who sold to James Harris in 2020. Calving Ease son of Rennylea L519 with very high marbling.

Booroomooka Payday P110 (NGMP110) – 7 sons to sell

Calving Ease sire sold to Simon Hawke in 2020. Low birthweight Lotto son with good growth, large scrotal size, muscle, shape and high marbling.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

.....
from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.
